2.03 Notable Features

ID#	NOTABLE FEATURE
1	Several bodies wrapped in bull rushes and paper lie on low plinths. Perhaps the ritual to enter them properly was not completed.
2	Thick clay plaques inscribed with intricate figure are placed carefully on shelves.
3	Large urns are filled with long scraps of parchment and strong smelling spices.
4	Herbs and spices spill from broken jars and stain the floor of this room filling it with a disgusting, musky and cloying aroma.
5	Rusted spikes and viciously hooked flensing knives lie rusting on a table; it seems a bizarre ritual involving mummification was carried out here.
6	Smashed sarcophagi stand against the walls, their lids seemingly smashed open from the inside.
7	Shelves stacked with jars of herbs and spices have collapsed to the floor, their fittings decayed from age.
8	Crumbling statues of sphinxes lie tumbled and smashed on the floor.
9	A ceremonial font filled with dried up and filthy dust and decay stands against one wall.
10	Mummified cats stand silent vigil on pedestals besides the door.

Quantz is the most addicting puzzle game I've played in a while.. This is an awesome take on the "inside an arcade wave shooter" genre, nice graphics, plays well, the 360Vspatial audio is very good as well.

If you like space pirate trainer you will probably like this one as well, similar gun & shield game play where you must protect your whole body from enemy fire, very good, I like both a lot.

I like just a little more, spacecats with lasers & xortex, they're much the same as this & space pirates, but the key difference being your controller is a ship & it is only that you need to protect from enemy fire, rather than your whole body.. Cool little game, overpriced in comparison to other game's content wise, don't listen at all as they instruct you in the campaign unless you want to DIE, get the idea and run with you own. For some of us older players it reminds me of Command and Conquer Red Alert with much, much less to do. I would also add a comp stomp mode as finding players is not easy.. Reminds me of Dark Cloud with Zeldalike dungeons. Great game.. The Mystery P.I. games are the series that got me into hidden object games a few years ago. That being said, it was a few years ago. These games have aged much better than a lot of the HO games from around 2009 though. The biggest complaint could be that you repeat scenes during the game, but new ones added in to keep it interesting.

There is no real story or voice acting that you see frequently today, though I don't think that is a real loss. What there is though, is a lot of quality HO puzzles with occasional simply solved arranging picture style puzzles between stages. If objects out of size perspective bothers you though, i.e. pencils the size of skyscrapers, avoid this like the plague.

tl;dr: quality old-style HO game, worth your while on sale.. 10/10 awesome!. Graphically, Way of Hero is fine, the game looks good. The gameplay is fast and lively, but unfortunately, quite basic. There doesn't appear to be a proper inventory system, and weapon management is quite basic. However, if you're satisfied with a simplified FPS shooter, this one may be suitable.

Make up your own mind with this gameplay: <https://youtu.be/V6L36nD5k1W4>

I buy every total war game because I love their games and every time I spend another 3 bucks on something that should just be in the game. Please fix the knowing bugs and update game some new stuff. A pretty short 2 hour run-of-the-mill HOG that doesn't seem to have anything new to the table. It works pretty well if you're just here for the gaming aspect of HOGs, I've encountered no bugs or issues others have voiced out. Fair warning though, both the puzzles and hidden object scene of this game pose no challenge which could equate to a very dull experience. There are maybe 1 or 2 puzzles that pass the time enough, but again it might fall into tediousness than actual difficulty. There are moments you could potentially miss an item (outside hidden scenes) because it's either not sparkling or just very hard to see.

I feel like the developers do stand a chance of creating something special, their visual department succeeds at a pretty good spot in comparison to other HOGs. Unfortunately, the lackluster storytelling and weak puzzle elements, make this game excessively mediocre. You can't even hate it or get frustrated, it's just very average.

I also won't forget to mention that the character models are pretty bad (both in motion and in graphic quality), and are arguably the most negative thing I could say about this game. It ruins the immersion. (But understandably animating is a huge pain in the butt and cost a lot of money and time to do.)

I do appreciate that the hidden object scenes reflect a semblance of cohesion. Most items are blended very well into the backdrop, almost looking hand-drawn into the scene. There was maybe one scene that was questionably poorer in quality than the rest. Heads up, I tend to play my HOGs in window mode (which I'm glad this game has btw) so I can't account how beautiful it continues to be in full screen.

Overall, it's...doable. It's been a while since I played a HOG so this was a good refresher course.. Here's my old review if you want to look at it: <http://i.imgur.com/LWrDdMl.jpg>

Every problem from the past review is fixed. Sean J was right and it captures everything right. My only problem with these videos is that I can't watch it all at once. Overall, I like everything from this video and I enjoy watching the interviews.. This game is amazing!
